

## BUNKER LINER RX

Bunker Liner Rx is a proven solution for your sand traps. Our system is a flexible surface to limit damage to golf equipment. Limits pooling of water and reduces the washouts. Excellent solution to keep foreign materials to migrate to the surface.

## SUSTAINABILITY

Rubber Granules are a 100% recycled material. The use of rubber granules from recycled tires have the potential to make a substantial contribution to reducing carbon emissions. When using this product you are contributing to remove old tires from landfills. About 80% of the tire is recovered with this recycling process. Every 1000 square feet of rubber granules installed is the equivalent of \*\*100-125 small vehicle tires.

## OUR ADVANTAGES

- Made from recycled tires
- Highly permeable
- Flexible
- Durable
- Shock resistant
- UV resistant
- Excellent adaptability to the unique features of each bunker
- Professional Installation available
